

Zenobia Lynn

Is a Criminalist III assigned to the Biology Unit at the Guam Police Department, Forensic Science Division.

I initially arrived on Guam in February of 1986 as a Sergeant with the United States Air Force, stationed at Andersen Air Force Base. After separating from active duty, I decided to make Guam my home and began working as a limited-term Health Education teacher at George Washington High School. I then utilized my Bachelor of Science in Chemistry from Alcorn State University Lorman, Mississippi to become the Potable Water Chemist at the FENA water treatment facility, where I conducted scientific analyses of drinking water for Navy Base Guam and the surrounding areas.

In October 1990, I joined the Guam Police Department Crime Lab, serving in the Drug Analysis Unit for 16 years. Subsequently, I cross-trained into the Biology Unit, where I continue to serve as the Senior Criminalist.

I genuinely enjoy my work as it allows me to contribute to the safety and well-being of the people of Guam. I am privileged to have spent 34 years working with the dedicated team of Police Officers and civilian personnel who comprise the Forensic Science Bureau.
